

Electrolytic kit AUTOMATOR E1250

State	NEW
Category	Engraving machine
Brand	AUTOMATOR
Model	E1250
Serial number	-
Year of manufacture	-
Inventory number	AUT-1027

CHARACTERISTICS

The electrolytic marking is a direct and economical marking system, able to preserve the integrity of the engraved piece that in this way does not suffer stress from deformation, alterations of the structure and thermal damage, for this reason it is particularly recommended for the machining of tempered parts. The result of the electrolytic marking is high-contrast, similar to that made with the laser engraver, even if completely manual.

COMPOSITION AND ACCESSORIES

The E1250 unit is inside a box, with 1 hand stamp and 100 stencils; 1 universal liquid for marking any material and 1 neutraliser; 1 contact plate and 1 set of cables.

Power: 60 VA
Power supply; 220 Vac 50/60 Hz
Output: 6 V; 7,5V; 9V; 10,5V; 12V
