

Hydraulic press SICMI PCV

State	NEW
Category	Press
Brand	SICMI
Model	PSV
Serial number	-
Year of manufacture	-
Inventory number	SICMI-PSV-XX

CHARACTERISTICS

Available in 30,50,70 tons

Features

Thanks to the handwheel with hydroguide, the movement of the main cylinder is extremely sensitive with a centesimal control of its position. This allows to easily carry out operations where absolute precision is required.

Since the descent speed of the cylinder is less than or equal to 10mm/s, it is possible to use it with just one hand. The platform is mobile and can be adjusted in height with the help of the main cylinder.

Use

Designed for use in straightening operations, insertion of bushings, inserts and various processing.

Mobile cylinder

The M version allows the cylinder to be moved transversely by means of a handwheel.

COMPOSITION AND ACCESSORIES

Optional

- Stem anti-rotation device
- Working plate
- Pair of V-prisms
